K-2 GTS – The gaming case with lots of features for a small purse!

The **K-2 GTS** convinces due to its spacious and robust design and has a variety of features. The PSU is mounted at the bottom of the case and is protected by removable dust filters. The serial 120mm fan with red LEDs behind the translucent front panel and the further 120mm fan with red LEDs in the rear of the case ensure an optimal cooling of your components. Additional fans can be mounted in the translucent cap and also on the window side panel.

Another highlight besides the well-thought-out cooling concept of the **K-2 GTS** is the easy and quick installation of all components. Serial guide screws ensure an easy mounting of the internal 3.5" HDDs. Two separated mounting options of 2.5" HDDs complete the variety of the case. Due to the combination of intelligent cable management and space for extension cards with a length of up to 37cm, the **K-2 GTS** becomes a space wonder.

The two USB 3.0- and USB 2.0- connectors, as well as the serial 2in1 Card-Reader (for MicroSD and SD) on the top of the case offer a fast and easy handling and complete the package.

K-2 GTS

Specifications

Motherboard	ATX, µATX
Max. Drive Bays	5.25" external: 1
	3.5" external: 0
	3.5" internal: 4
	2.5" internal: 2
