High Definition Surveillance

C50+ provides you a clear view of what's going on at home.
With the HD (1280*720p) video, house security can be fully ensured.

Motion Detection & Notification/Image Push

When detecting motions, the camera automatically triggers alert and takes a snapshot. Notification Push: the information of the alert can be pushed to you on the phone as soon as the alert is triggered.Image Push: the snapshot of the alert can be sent to your phone so that you can see the details.

Night Vision

Worrying about being trespassed at night? C50+ protects you and your family
in the darkness. With the help of 9 IR-LEDs, when there is not enough light,
C50+ automatically turns to the night vision mode,
in which you can see things as far as 10 meters at night.

Two-way Audio

Besides real-time video, C50+ allows you to talk with your family members via mobile phone.As long as you press the microphone icon on your screen, built-in microphone and loudspeaker makes family online communication more comfortable and convenient.

SD/TF Card Storage

The recorded video can be stored in the SD/TF card, which can be plugged in the external TF card slot.C50+ allows a maximum of 64GB TF card storage. And a 64GB card can save the video for about 400 hours. You just need to click the "record" button and you'll see the video recorded in the SD card.

Attachment: video storage schedule

TF Card
