

DP to VGA Adapter Aculine AD-017

Overview:

The Aculine DisplayPort to VGA adapter lets you connect a VGA computer monitor to a DisplayPort video card or other DisplayPort source, eliminating the expense of upgrading the monitor for compatibility.

The DP to VGA adapter uses an integrated chip to provide an active digital to analog conversion.

This adapter converter is an ideal solution for converting the DisplayPort output of a laptop so that it may be connected to a computer monitor which accepts a VGA input. This adapter converter carries an analog video signal, supports up to a 1920 x 1200 resolution and meets the requirements of high performance applications.

Features:

Portable adapter for connecting a DisplayPort equipped computer to a monitor, projector, or TV with VGA; A separate VGA cable (not included) is required Supports resolutions up to 1080p (Full HD) and 1920 x 1200 Gold-plated connectors resist corrosion, provide rigidity, and improve the signal performance; Latching DisplayPort connector provides a secure connection DisplayPort to VGA is not bi-directional; it only works from DisplayPort to VGA Available in different video output interfaces
