

K800

Seamlessly change from gaming to voice calls

Microphone features a 120° rotation

Leather padded ear cups also prevent sound leakage

Volume and mute controls conveniently located on the headset

High performance 40mm Neodymium unit makes this headset the perfect fit for gaming and online conversation needs. Offering a strong bass and high-quality treble, the K800 will help you conquer any game.

Louder sound than before

Padded ear cups make your listening experience exceptional. Acting as a sound insulator, the ear cups prevent sound leakage and create a seal around your ear isolating sound.

Talk for hours

Designed with a high-sensitivity microphone, the K800 will let you talk to friends and family online for hours. It will seem like they are in the room with you. Featuring a 120-degree rotation, conveniently place the microphone where it best suits you. Mute it or adjust the volume with the built-in controls located on the wire.

Comfort

Wear it for hours on end. Soft leather padded ear-cups and the lightweight frame of the K800 make it the most comfortable headset you have worn.
