

Pci Gigabit Lan Card Power On LAN-200

Power On

Overview:

The LAN-200 is an auto-negotiation Gigabit Ethernet adapter fully compliant with PCI2.2. It offers speeds sufficient to meet the needs of today's most demanding network applications in 1,000Mbps full-duplex mode. In addition, this adapter supports ACPI power management and NMA auto-negotiation. The LAN-200 is an easy and economic way to get your PC or server on a Gigabit network.

Features:

- Complies with IEEE 802.3x full-duplex and flow control
- Complies with IEEE 802.3, IEEE 802.3u, and IEEE 802.3ab
- VLAN support with IEEE 802.1q priority queuing
- Supports QoS
- NMA auto-negotiation
- Supports UPnP
- Auto-negotiation 10/100/1000Mbps LAN port
- Complies with PCI 2.2
- ACPI power management
- Supports jumbo frames
- Provides up to 2,000Mbps transmission rate
- Boot ROM socket
